About AutoCAD Training at Gyan Hub

AutoCAD is a powerful software used for creating precise 2D and 3D designs in engineering, architecture, and construction. It enables professionals to draft, model, and visualize complex structures, improving efficiency and accuracy in design processes.

AutoCAD training is essential for civil engineers, architects, designers, contractors, and drafters, with applications in 3D printing as well. Recognizing the need for skilled professionals, Gyan Hub provides advanced AutoCAD training designed to help you create accurate blueprints for buildings, roads, and other infrastructure projects.

The benefits of joining our AutoCAD training at Gyan Hub are immense, as we provide a comprehensive and industry-focused learning experience. Our course is designed to equip you with the skills and knowledge to excel in AutoCAD, ensuring you're ready for real-world projects and career advancement.

✓ Training Benefits

✂ Comprehensive Training

- Complete AutoCAD training** from basic to professional level
- Master key commands**, shortcuts, and practical techniques
- Hands-on exercises** with virtual projects and drawings

👤 Expert Support

- Expert trainers** from Pulchowk Campus
- Lifetime access** to course materials
- Professional certification** upon completion

🏢 Industry Standards

- In-depth knowledge** of Building Byelaws and Codes
- Municipal Drawing Formats** training
- Latest NBC 205:2024** integrated curriculum

⚙ SW-DTM

- Importing survey points**
- Making contours** and road alignment
- Creating L-sections** and X-sections
- Calculating cut-fill volume**

📦 Advanced Features

- Simultaneous 3D visualization** using Revit software
- Special focus on Municipal Projects**
- Industry-ready training methodology**

🌐 Google Earth Pro

- Surveying and exporting points**
- Measuring area** and distance
- Exporting data** to KML and KMF formats

26-Day Training Schedule

Week 1: AutoCAD Fundamentals

Day 1: Basic AutoCAD Settings

Getting Started

History of AutoCAD, Overview of AutoCAD Interface, Units, Limits, Zoom, Pan, Mouse and Keyboard Navigation, Setting Up Workspace.

Day 2: Drawing Toolbars

Essential Drawing Tools

Line, Polyline, Circle, Arc, Rectangle, Ellipse, Polygon, Construction Lines, and Hatch.

Day 3: Modify Toolbars

Modification Commands

Move, Copy, Rotate, Mirror, Trim, Extend, Offset, Scale, Fillet, Chamfer, Array, and Explode.

Day 4: Annotations

Text and Dimensions

Adding Text, Multiline Text, Dimensions, Leaders, and Annotative Text Styles.

Day 5: Layers

Layer Management

Creating and Managing Layers, Layer Properties, Layer Filters, Layer States, and Templates.

Day 6: Groups and Blocks

Block Creation

Creating, Modifying, and Inserting Blocks and Groups.

Day 7: Properties and Tool Palettes

Object Properties

Editing Object Properties, Quick Properties, Tool Palettes.

 Week 2: Advanced Tools & Utilities**Day 8: Utilities** **Measurement Tools**

Measuring Tools, Calculating Areas and Distances, Quick Select, and Drawing Recovery.

Day 9: Design Center **Resource Management**

Using the Design Center for Block, Layers, Dimension styles, and Layout Management.

Day 10: Printing - Fit to Paper **Basic Printing**

Setting Up Print Layout, Page Setup Manager, Printing Fit to Paper, and Handling Print Settings.

Day 11: Printing in Scale and Layout Templates **Advanced Printing**

Plotting to Scale, Creating Layout Templates, Batch Printing, and Managing Plot Styles.

Day 12: Inserting Maps **Geographic Integration**

Attaching Geographic Locations, Importing and Managing Maps from Google Earth Pro, Using Coordinate Systems.

Day 13: MRT and Building Codes/By-laws **Regulatory Compliance**

Understanding Mandatory Rule of Thumb (MRT), Building By-Laws, and Building Codes.

Day 14: Location Map**Site Planning**

Creating a Location Map, Adding Landmarks.

🏠 Week 3: Architectural Design

Days 15-17: Building Plan Development

🏠 Floor Plan Creation

Creating Floor Plans, Room Layouts, Walls, Windows, Doors, Staircases, and Adding Furniture Layouts, etc.

3-Day Intensive Workshop ⚠️

Days 18-19: Building Elevations

🏠 Exterior Design

Drafting Front, Side, and Rear Elevations, Adding Exterior Details, and Applying Annotations.

2-Day Focus Session ⌚

Day 20: Building Sections

✂️ Cross-Section Drawing

Cutting Sections Through Building Plans, Adding Annotations, and Detailing.

🏠 Week 4: Structural Design & Completion

Days 21-23: Structural Drawings

🏠 Structural Engineering

Developing Structural Plans, Columns, Beams, Footings, Reinforcement Details, and structural drawings.

3-Day Advanced Module ⚙️

Day 24: Final Printing and Presentation

📄 Professional Output

Setting Up Final Layouts, Adjusting Scale, Adding Title Blocks, Batch Printing, and Final Plot Presentation.

Day 25: Google Earth Pro and SW-DTM

🗺️ Survey Integration

Exporting images, Extracting survey points, Converting .kml file to survey data points, .txt format, Importing points, Contouring works, Creating alignment, L-section, and X-section.

TRAINER: ER. Ajay Bhattarai

Day 26: Course Wrap-Up

🏆 Graduation Day

Final Project Presentation, Feedback Session, Q&A, Certification, and Closing Ceremony.

Certification & Celebration 🎓 🎁

📘 Additional Information

Course Flexibility & Support

- 📅 **Extended Support:** If the course is not completed within 26 days, additional days will be provided to ensure completion.
- 📺 **Supplementary Materials:** Additional recording videos on specific topics will be provided as per students' requirements.
- 🌐 **Lifetime Access:** Continuous access to all course materials and resources even after completion.
- 🌟 **Industry Recognition:** Receive a professional certification that's recognized by industry leaders.

🚀 Join Gyan Hub for Complete AutoCAD Learning Experience
